# PERCENTAGE OCCUPANCY OF PUBLIC COLD-STORAGE WAREHOUSES

END OF MONTH OCCUPANCY

Commodity summary

Warehouse holdings of frozen turkeys totaled 183 million pounds on October 1, according to reports received by the Crop Reporting Board. This was a record for the date and almost 50 percent larger than the October 1, 1955-59 average. Total stocks of frozen poultry, were also above all previous October 1 levels. With 289 million pounds stored, poultry stocks were 4 percent larger than a year earlier and almost one-fifth above average for this time of year. A strong seasonal gain in stocks of frozen vegetables brought national holdings up to 922 million pounds. This compares with 925 million held on October 1, 1959 and average stocks of 862 million pounds. The September gain of 121 million pounds was 46 percent more than average and more than twice the September 1959 gain. Frozen fruit holdings increased 16 million pounds to 513 million. These supplies were slightly under average for the month and the stocks of a year earlier. The September gain in frozen fruit stocks was 6 million above average but compares with a 12 million pound decrease during September 1959. Orange concentrate stocks fell off 4 million gallons to 25 million. The reduction was slightly less than average and almost 50 percent less than the September 1959 reduction. Holdings for this date, however, were 19 percent below a year earlier and 3 percent below average. Warehouse holdings of shell eggs were reduced to 481,000 cases, a reduction of 265,000 from a month earlier. Frozen egg stocks were down to 140 million pounds by October 1, a reduction of 18 million pounds since September 1. These supplies, while below average for the date, were 4 percent larger than a year earlier. Butter holdings declined to 136 million pounds while American cheese holdings were reduced to 300 million pounds. For the date, stocks of butter were 11 percent under average but 46 percent greater than a year earlier, while American cheese holdings were under both the average and a year earlier. Red meat supplies, at 398 million pounds, compare with 408 million stored on October 1, 1959 and 344 million, the average.

General commodity movement

With the start of the final quarter of the year, warehouse stocks in cooler space were up 35 percent from a month earlier. October 1 holdings totaled 2.1 billion pounds, about average for the date. Significant gains were registered in holdings of fresh fruits and vegetables. All other items, except canned milk, were reduced in supply during the month. Freezer stocks showed only a slight change from a month earlier with stocks at 3.1 billion pounds on October 1. Increases in stocks of poultry, fruits, vegetables, and selected red meat items were about balanced by reductions in stocks of cream, butter, eggs, juices, and pork.

Storage occupancy

Public refrigerated warehouses during September showed increased space utilization. Cooler occupancy increased 1 percentage point to 53 percent by October 1. For the date last year, cooler occupancy was 55 percent while the average occupancy is 58 percent. Increases in Middle Atlantic up 7-points, South Atlantic up 6-points, and East North Central up 1-point overcame declines in the other regions. An increase of 2-percentage-points brought freezer occupancy to 75 percent on October 1. This level equalled that of a year earlier and was above the 1955-59 average of 72 percent. Increases in freezer occupancy were wide-spread regionally except for no change in New England and a 4 point decline in West North Central.

Dairy and dairy products

Seasonal outmovement of cream stocks during September totaled 4 million pounds. This brought October 1 warehouse stocks to 20 million pounds-equal to average holdings but 41 percent above a year earlier. The reduction in butter stocks of 33 million pounds during September was about average but 6 million less than that occurring during September 1959. Holdings of 136 million on October 1 were 46 percent larger than those of the same date last year but 11 percent below the 1955-59 average. American cheese stocks were reduced 18 million pounds during September. This brought October 1 stocks to 300

million pounds which were 8 percent below holdings a year earlier and 30 percent below average.

#### Meat and meat products

Refrigerated warehouse stocks of red meats declined 63 million pounds during September, compared with reductions of 24 million last year and 32 million, the September average decline. Holdings totaled 398 million pounds on October 1. These national stocks, although 16 percent above average holdings, were 2 percent below a year earlier. A seasonal gain of 9 million pounds in beef stocks during September exceeded those of a year earlier and the average. October 1 stocks of beef totaled 162 million pounds-5 percent below holdings on the same date last year, but 30 percent above the 1955-59 average. Reduction in pork stocks of 67 million pounds during September exceeded reductions last year by 47 million and average by 40 million. October 1 stocks totaled 154 million pounds, equalling average holdings but 6 percent below October 1, 1959. All frozen pork items declined during September.

#### Vegetables, fruits, and juices

During September, stocks of most frozen vegetable items increased seasonally. The most significant gains were in stocks of lima beans, snap beans, and corn. These coupled with lesser gains in stocks of the other items, except asparagus, peas, mixed peas and carrots, spinach, and french fries, added 121 million to the previous month's total. By October 1, frozen vegetable holdings were up to 922 million pounds. On the same date last year, 925 million pounds were stored while the average is 862 million pounds. October 1 holdings of Fordhooks were 49 million pounds; baby limas, 53 million; and corn, 88 million pounds. Stocks of green peas were lowered 5 million pounds to 278 million. These stocks were slightly larger than average but 5 percent under the weight in storage a year earlier. A 4 million pound net-reduction in stocks of orange concentrate brought warehouse holdings to 25 million gallons. This September decline compares with 7 million during September 1959 and 5 million, the average. Holdings, however, were 19 percent under the level of October 1, 1959 and 3 percent under average. Frozen fruit stocks increased 16 million pounds to 513 million by October 1. The gain was 6 million larger than average but compares with a net reduction of 12 million pounds during September 1959. Frozen strawberry stocks were reduced 20 million pounds during September last year. This year the decline amounted to only 4 million pounds leaving 201 million in storage on October 1. Average stocks are 211 million while 208 million was stored on October 1, 1959.

#### Poultry and poultry products

Stocks of poultry meats moved into storage rapidly during September. The seasonal gain, 88 million pounds, compared with 51 million during September 1959 and 61 million, the average increase. Holdings on October 1 totaled 289 million pounds which was 4 percent above stocks in storage on October 1, 1959 and 19 percent above average. Turkey stocks increased 70 million pounds during September. This brought the October 1 holdings to 183 million pounds, a record for the date. Broilers & fryers increased 2 million pounds and October 1 stocks totaled 22 million pounds. A 10-million-pound increase during September in hens (fowls) stocks brought national holdings to 39 million pounds. These stocks compare with 66 million stored on October 1, 1959 and the average, 50 million. A 265,000 case reduction in shell egg stocks brought October 1 holdings to 481,000 cases. Shell egg stocks totaled 554,000 cases on October 1, 1959 while the average is 721,000 cases. The 18 million pound reduction in frozen egg holdings equalled the average decline but was 4 million more than during September last year. Nearly 140 million pounds of frozen eggs were in storage on October 1.
